

Referring to the Refugee Health Service

Specialist primary health care services for refugee and asylum-seeking clients in South Australia.

Services are targeted towards new arrival clients with complex health and psychosocial issues.

New Arrival Health Assessments

Comprehensive Health Assessment and early intervention management of all health and psycho-social issues related to migration with supported transition to community GPs within 6 – 12 months.

Complex Client Support

Safety net services in the post-settlement period - up to 5 years after arrival - for clients struggling to access mainstream primary care services and not engaged with a local GP
