

*Supporting consistent
pathways of care across
the health system*

HealthPathways

SOUTH AUSTRALIA

HealthPathways is an online portal that provides GPs and other health professionals with easy access to comprehensive, evidence-based assessment, management and localised referral resources for specific health conditions.

Working in partnership, SA Health, Adelaide PHN and Country SA PHN are implementing HealthPathways across South Australia to support consistent care and management of health conditions and improve the health outcomes and journey of patients through our local health system.

HealthPathways is free and accessible anywhere, anytime. With up-to-date condition specific pathways, and access to relevant patient resources and local service information, HealthPathways is designed to be used at the point of care to support health professionals in providing quality care.

If you are a health professional in South Australia and would like more information or to register for access to HealthPathways South Australia, visit our project site saproject.healthpathwayscommunity.org

This activity is supported by funding from the Australian Government under the PHN Program
