

The Central Northern Adelaide Renal and Transplantation Service (CNARTS) is one of Australia's largest renal units, providing specialist nephrology, dialysis therapies and kidney transplantation.

Services include:

- Management of all kidney conditions and chronic kidney disease (CKD)
- Inpatient and outpatient consultant-led service (medical and surgical)
- Peritoneal and haemodialysis – in hospital, self-managed, in home and via outreach 'satellite' units across South Australia (SA)
- Multidisciplinary dialysis start program
- Kidney, pancreas and islet cell transplantation – SA and NT patients
- Dialysis access – medical and surgical
- Clinical trials
- Kidney Care team – CKD and renal treatment options – education and support
- Renal nurse practitioners – home therapies, haemodialysis and supportive care
- Allied Health renal specialists: dietetics, social work, pharmacy, psychology, Aboriginal health practitioner
- Renal nurse specialist consultation and service coordination for: vascular access, transplantation, complex care needs
- 24/7 onsite and on-call medical staff
- Regional area and telemedicine consults

Dr Ewan Macaulay

Fellows, Registrars, Residents and Students

For the outpatient clinic locations attended by each staff member, please refer to [Nephrologists and Surgeons](#) on the CNARTS webpages.

CNARTS is a research, teaching and training unit

Referrals:

For urgent opinion and referrals, please contact the on-call Renal Registrar via (08) 7074 0000. Urgent referrals will be seen the same day or as soon as possible; non-urgent referrals will be rapidly triaged and seen as soon as possible.

For more refer to [Referral information](#) on the CNARTS webpages.

Public services are available at the RAH, TQEH & Lyell McEwin hospitals. All public patients have a lead primary nephrologist for continuity of care.

Private consultations (Medicare bulk billed) are provided at all locations. A current referral to a named specialist is required.

Patients are triaged on clinical need and may be seen by another specialist to expedite treatment.
