

Consumer, Carer and Community Engagement Contacts for health sites

SA Health is committed to engaging and partnering with consumers, carers and the community. We value the positive contributions they make in improving health care service quality, equity and management. Effective consumer engagement begins with health services working with consumers, carers and the community, as equal partners in their own care, to deliver better health outcomes. Consumer engagement is essential for health service culture, quality and safety and patient centred care. To find out how to get involved in a consumer, carer and community group in your area, a list of health service contacts is provided below:
