2024 Research Capacity Building for Allied Health Clinicians

## Workshop: How to analyse qualitative data

#### AIM:

- To provide information about some different types of qualitative data analysis
- To introduce participants to the basic principles of qualitative data analysis

#### OBJECTIVE:

To be able to think critically about choices for managing and analysing qualitative data

#### CONTENT:

Alignment of research methodology, research question and methods of analysis; providing overview of two main types of analysis – reflexive thematic analysis and content analysis; use of software to manage qualitative data; methods for rigour before, during and after analysis.

#### FORMAT:

Online via zoom, combination of didactic presentation, videos and interactive questions. The sessions will be recorded and sent out to all those who have registered upon conclusion.

A link will be provided following registration.
